

PATHWAYS FOR HEALTH

Paris, 21-22 June 2006

Dr Alain Rigaud
Chairman ANPAA

Pathways for health

- Good morning to you all
- Welcome to Paris
- As chairman of ANPAA, I am happy to meet you on the occasion of the « Pathways For Health » project.

Pathways for health

- We feel all the more happy of your choice for Paris since the positions of some French politicians and last year popular disapproval of European Constitutional Treaty may have puzzled our European partners.

Pathways for health

- Actually, ANPAA is *much* concerned with a European vision of Public Health. We are involved on this field since our Summer School of 1991, whose consequence was the creation of EURO CARE.
- Since then, ANPAA works on European projects, with few funds, but with some staff, timework and ideas...

Pathways for health

It is true that progresses are slow, but Public Health is on the European agenda since the Maastricht treaty and the Commission is fully funding and supporting NGO's works like the “Pathways for Health” project

Pathways for health

I wish you fruitful
working sessions and
a nice stay in Paris
enjoying the « Fête de
la musique »

This French initiative is
now developing in
many European
countries.

I have a dream : could
our “Loi Evin” meet
the same success ?
